

Miss Claridge's Character description of selected alien:

Boggle the alien has multiple, ocean coloured eyes which wobble on top of his head when he talks. His thin, slimy fingers act like claws and can be used to control his intergalactic spaceship. He has yellow spots covering his tummy and when he is happy, they turn a bright pink colour instead! Boggle only has one tooth because the rest fell out, due to his planet not having any toothbrushes to correctly brush their teeth! His legs may be short, but they are as strong as an ox and he can walk for miles on them over the bumpy surfaces of some of the planets. Finally, Boggle's emerald green skin feels as smooth as snake skin. It also glows in the dark so that others can clearly see him amongst the pitch black galaxy.
