

Life Cycle of a Bean

Draw a picture and write a sentence in each box to show the four stages of a bean's life cycle.

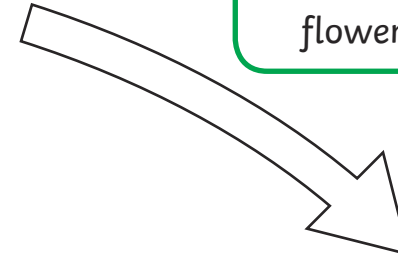

Word Bank:

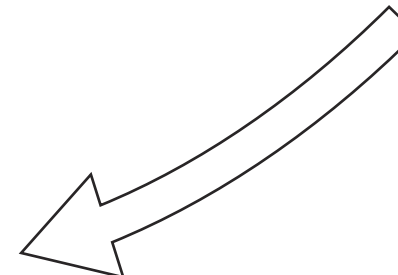

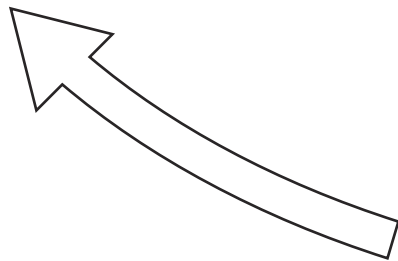

bean planted
growing plant
soil shoot
flowers bean pod

Life Cycle of a Bean

Answers

Children's sentences may differ.

Word Bank:

bean	planted
growing	plant
soil	shoot
flowers	bean pod

The bean is planted in the ground. After a few days, a small shoot will start to appear.

The bean will start to take root and a stem will appear.

The bean plant will grow taller and will eventually flower.

Pods will start to grow on the plant. There are beans inside each pod.
